LAND

We harbor a deep respect for our historical connection to the **Land** our equipment is built to work in. Since our launch in 1950, we have engineered industry leading heavy machinery that continues to set global standards.

CROS

As we look towards the future we strive to meet our **C**ustomers' core needs with a focus on **R**eliability, increased innovation through **O**pen collaboration, and continuing to create breakthrough **S**olutions.

SOLUTIONS BEYOND MACHINERY

The official launch of the LANDCROS brand in April 2027 is only the beginning. Over the next few years, we will introduce innovations that can accompany you through your entire journey. From remote controlled machines to AI guided maintenance to digital twins of equipment for monitoring, LANDCROS will have the solutions you need for the jobsites of the future.
